CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING I YEAR SUBJECT: MICROBIOLOGY UNIT 2 INFECTION CONTROL

Date: 15/10/2018

Human beings survive in the world even though they are surrounded by crores and millions of harmful micro organisms. We are living because we have got innate immune system.

Practicing infection control measures are very much significant while considering patients safety while in the hospital. For this every one should aware of it and practice in the hospital.

Our B.Sc. Nursing students have been taught about the hand hygiene, various agents used for disinfection and equivalent solutions available. In order to make them thorough with these practices, we have given training to them the lab and then direct classes from hospital infection control. Hospital infection control nurse taught them advanced precautionary measures and practices.

Every student get opportunity to train along with infection control unit while they are in hospital for practice. Activities included listing of currently available preparations for various areas of the medical unit.

These measures and practices encompasses all cross cutting elements.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: SOCIOLOGY UNIT 2
INDIVIDUAL AND SOCIETY
Date:22/11/2018**

Mostly we use the terms Community and society synonymous . Normally all human beings consider them as a member of community. When ever there is we feeling , individuality in them come to sharing and socially concerned life.

But when ever a person think of self than others especially those of the family; there come more individuality and selfishness which are not a typical community attitude that is expected. this may later on develop as disorganization and related behaviors. We must think of others then only we also can survive.

B.Sc. Nursing second years students have been taught these basics with small video making on self imposed persona and society.

Activities included group discussion and quiz.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: GENETICS UNIT 4 GENETIC CONDITIONS OF ADOLESCENTS AND ADULTS

Date: 15/08/2019

Many genetic disorders will not be manifesting until it reaches the peak. Some genetic disorders are identified at birth, some in early childhood.

But later in the life some are hidden and suppressed such as allele of recessive gene pair. Identifying vulnerable couple before conception and give timely education can prevent even adolescent genetic disorders.

It may not be necessary the problem was present during birth, but by exposure to certain chemicals and aberrations due to growth spurt may contribute in the development of these types of errors.

So we teach our students in such a way that they can convey these information to the young children.

Keeping healthy mind also another measure for prevention of many illnesses of adolescence period.

Avoiding of excessive chemicals such as powders and sprays and many costumes irrespective of warning signs to be informed. Activities included enlisting of certain chemicals commonly used at home which should not be used so frequently and ways to avoid harmful exposure from it. This encompasses addressing of all cross cutting issues.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: PATHOLOGY UNIT 5 URINE AND FECES

Date: 26/09/2019

Understanding the basics of managing lab samples are essential for nurses working in any setting.

The very common lab test urine test that is commonly advised, but giving mid stream sample most of the time neglected.

The chances of contamination is quite common and causes errors in lab results. This further create chaos and unwanted treatment too. In the same manner routine test of stool sample may be considered good in some places as it indicates gut health too.

Our students were taught how to collect the specimen, time of storage as well as contamination prevention etc with the usage of lab instruments.

Ethical aspects were covered during class and lab teaching.

Activities included collecting lab reports from random pick and explain results. Students were also given task to assist patients in the hospital lab and guide to collect urine samples.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR

**SUBJECT: COMMUNITY HEALTH NURSING
UNIT 4: EPIDEMIOLOGY OF NURSING MANAGEMENT OF
COMMUNICABLE DISEASES**

On 3rd December 2018 a health awareness program as part of learning activity was organized along with the NGO "VISHWAS" who are working for the people affected with HIV. The venue was **Choithram Sabji Mandi**. The program was started with slogans followed by role play. Role play was aimed to give message of the real living of people affected with HIV. Students acted out various social stigma related with AIDS. Vendors and sellers, vegetable handlers and drivers were present at the site and take in the concept of the role play.

Pamphlets related to AIDS were also distributed among public.

Students role play was marvelous with projected message of safeguarding self and then others.

The myths and truth were cleared. This event conveyed moral and value system needed to practice among all especially those who are vulnerable.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: GENETICS UNIT 2**

MATERNAL, PRENATAL AND GENETIC INFLUENCES ON DEVELOPMENT OF DEFECTS AND DISEASES

Date:14/06/2019

All children are unique and have the right to live.

Understanding the certain actions that harm the growing fetus is known to many; but some neglect it and some may not be able to get timely advice. We as health workers have the social responsibility to share the information that are utmost significant for the health of future generations. Counseling to couples are essential before planning pregnancy especially for vulnerable couples. We have taught our students the basics as well as factors affecting child growth and elucidate it to take care of others in the society.

Classes on Maternal, prenatal and genetic influences on development of defects and genetic disorders aimed to mainstream our students to make them as good counselors and carers with concern of others. Activities included depiction of genetic counseling by a role play. Group discussion on the above was also done.

So the chapter deal all the cross cutting area very clearly.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR SUBJECT: MENTAL HEALTH NURSING UNIT 9: NURSING MANAGEMENT OF PATIENTS WITH SUBSTANCE USE DISORDERS

INTERNATIONAL DAY AGAINST DRUG ABUSE

To educate all health care team about substance abuse ;a symposium was organized on 26th June 19 at Banganga Mental Hospital. B.Sc. Nursing III year students as well as M.Sc. Nursing students learned from the symposium where experts gave series of talk on various aspects of substance abuse. They stressed that it is common in India now, but the preventive measures is not yet clearly publicized. The speakers were Mr. Sushil kumar gupta (Retd. Chief Justice of M.P high court), Mr. Prasant Choubey(Asp Mp.Police), Dr. K.K Arora, Mr. Shailashanand Giri, Dr .Brijbala Tiwari (Secr. Ima) and Dr. Tripathi. All the speakers provided measures of eradicating drug abuse from our country.

Students gained in depth knowledge from this series of talk.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR SUBJECT: MEDICAL SURGICAL NURSING UNIT 3 NURSING MANAGEMENT OF PATIENTS WITH NEUROLOGICAL DISORDERS

Parkinson's disease and other degenerative diseases are always affect the quality of life. In order to make the affected person's life more dependant, we have to first understand their capabilities, then assist and encourage them to do daily actions. This give them more confidence and that convey the neuronal system about updated activity level.

For this, movements in rhythmic manner enable them to make their pace and focus level better. With this aim, we have arranged expert teaching session on alternative therapy for these neuro- brain cum muscular disorder. On 17 October 2019, Ms. Shubha Bangur -Dance movement psychotherapist in conducted a training session on Dance Movement Therapy.

All have enthusiastically participated in the moves and learned the alternative measure. Since the aim was to teach the students, at the same time for the betterment of people it convey many ethical aspects.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR SUBJECT: OBSTETRICAL AND GYNAECOLOGICAL NURSING UNIT 3: ASSESSMENT AND MANAGEMENT OF PREGNANCY

Date: 17/07/2019

Giving birth is a gift and taking care of babies are prestigious for all parents. But nurturing and uplifting the child to his/her fullest potential is not an easy task.

Getting pregnant is proud for any married woman. But there are certain cultural and moral nature and norms with domains in all places in the world.

We as human beings understand the growth of the society as some thing good, but following all the modernization is not appreciable when it come to the case of caring children.

Teenage pregnancies affect the health of mother very badly as well as upbringing of the child with all good values. All children has to get care from matured enough parents, for this proper age of marriage is essential. That is why child marriage system is not allowed.

Keeping all these cultural and social aspects we teach our students to live a life with strong folded hands to get into good value system.

The students were asked to prepare a chit and asked to vote for or against modern fantasies such as surrogacy, divorce, single parenting, living together.

Followed by this debate also done.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING IV YEAR SUBJECT: NURSING RESEARCH AND STATISTICS UNIT 6

Date: 20/06/2019

The chapter statistics deals the analysis part, but it comprises the maximum ethical aspects in it. The compilation and tabulation must be according to the ethical and legal guidelines of research.

In order to make a sense of social responsibility and ethics, we ask our students to maintain research attitude in all assembling task. We inculcate a value system in our institute by teaching our students to be sincere and adhere to the standard to the Research Society and recommendations. Also insist our students to avoid any kind of plagiarism.

Students were taught about intellectual property rights and legal components. Along with that in order to make them valued nursing professionals and citizens; we have insisted the need to make own project work with key aspect as minimizing plagiarism with proper referencing.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

M.Sc. NURSING I YEAR SUBJECT: NURSING EDUCATION UNIT 11 : TEACHER PREPARATION

Date: 12/12/2018

Teaching profession is based on values and nurturing.

Every one in this profession must be able to identify each student as unique and different. Teachers preparation as given in the curriculum was taught with emphasis on human values.

In order to make emerging nurses critic, and useful to the profession, we incorporate clinical skills as well as teaching skills as a mandatory area of professional requirement. Our M.Sc. Nursing students portrayed immense value and skills.

Preparing teachers as professional volunteers endeavor new version to teaching scene as the students impart intellectual skills as one of the domain to identify students. Keen to this view, we assign our M.Sc. Nursing students to teach the B.Sc. Nursing students in the evening hours also to continue with their learning and teaching skills.

Along with this, to make teaching more systematic students are asked to prepare lesson plans and unit plans.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

M.Sc. NURSING II YEAR SUBJECT: CHILD HEALTH NURSING UNIT 2: PEDIATRIC MEDICAL DISORDERS: THALASSEMIA

On 29/06/2019 MSc. Nursing students as a teaching and learning cum awareness activity presented a dance form about Thalassaemia.

The program captured attention of many as it's motive was spreading awareness about prevention and treatment of Thalassaemia. Thalassaemia is one of the most debilitating illness that affect the growth of children. But if they receive proper treatment at the early age, it can even reduce the residual effects on circulatory system and there by all other systems.

Taking pledge convey a sense of responsibility. Our students taken initiative to lead a pledge to make others sensitive to such children. So this part of curriculum

incorporates ethical and cross cutting issues.

CROSS CUTTING ISSUES

B. Sc. NURSING I YEAR SUBJECT: ANATOMY AND PHYSIOLOGY UNIT 6: CIRCULATORY AND LYMPHATIC SYSTEM

Date: 10/10/2019

This unit of anatomy and physiology focus on structure, associated all organs and components of blood as well as functions.

The structure of heart is so wide and at the same time circulation is so complex. The students were taught in such a way that they understand the cardiovascular system in depth and utilize the knowledge in all the areas they work. As cardio and brain as well as lungs so closely connected, all the relations among these also reviewed.

Sessions were so interactive and students queries were clarified.

A quiz among students were arranged and the participants were all the students.

Gentleness is the key way to deal the particular ailment. This was taught to them so as to keep guard of cross cutting elements.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING I YEAR SUBJECT: NURSING FOUNDATION UNIT III: HOSPITAL ADMISSION AND DISCHARGE

Date: 17/02/2020

Admission and discharge are the basic aspects for any person while hospitalization. This aspect must be dealt in such a way that it commemorate all the ethical and legal issues. All individuals are unique irrespective of any criteria or region, but we count them as humans who have the right to get medical treatment as early as possible without any indentation to divide the wholesome part of care they deserve.

The teacher teach them the admission process that is the very first inside treatment opportunity and care them by keeping all the above described part.

Just involve all in the care. That is the most and prelude part.

So our students gain all knowledge on this with practice on writing admission and discharge notes and formalities in the note book with case scenarios.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING I YEAR SUBJECT: PSYCHOLOGY UNIT 5: PERSONALITY

Date: 20/06/2019

Personality is the basic part of every individuals once they born as a unique baby.

The child's mentality, physic and the entire environment along with gender make them different. The gene contributes a lot on this matter.

How ever we understand that each individual are different; even then there are certain behavioral similarities shown as outward profile. But we understand this as only outward; inward psyche of every one is very special.

Keeping this view in mind, we teach our students how to maintain the uniqueness and personality of each individual.

Understanding personality and interact team members and patients are also very much emphatic for nurses.

So we give such activities to them to do a person drawing and identify personality.

B.Sc. NURSING I YEAR SUBJECT: MICROBIOLOGY UNIT 5 IMMUNITY

Date: 23/09/2019

Human beings survive in the world even though they are surrounded by crores and millions of harmful micro organisms. We are living because we have got innate immune system. The activated immunity and prophylactic immunity makes the person more immune. For that some time we are recommended to take vaccines as per the guidelines.

The way to give immune boosting vaccines, its condensation and even transportation definitely affects its effectiveness in every one. There comes human values, environment and ethical aspects in medicine.

We teach our students to learn and keep watch on newer generated vaccines.

The activity included observing vaccination aspects: storage, transportation, cold chain and maintenance and present assignment on any single child till 12 years of age.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: SOCIOLOGY UNIT 4 SOCIAL GROUPS AND PROCESSES

Date: 21/9/2020

Social and society are very common usages. We as social beings need to meet and work for others.

There are many types of groups existing in the society, but some are for good concerns and others may not be. The types of groups are also vary from region to region.

All students were taught in such a way that they understand group dynamics and maintain the integrity without disrupting the unity. In order to make them understand the students were divided into many social groups and asked them that now present yourself as the member and if any disputes occur how to solve with minimization of conflicts. This activity aided students insight that all groups have their own worth.

The unit targeted to address all cross cutting areas.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: GENETICS UNIT 2**

MATERNAL, PRENATAL AND GENETIC INFLUENCES ON DEVELOPMENT OF DEFECTS AND DISEASES

Dat: 20/8/2020

Taking care of a mom during her pregnancy is for both mother and child. We know this. But to take care with caution is of utmost significance to get a healthy child from the womb.

Counseling to couples are essential before planning pregnancy especially for vulnerable couples. We have taught our students the basics as well as factors affecting child growth and elucidate it to take care of others in the society.

Classes on Maternal, prenatal and genetic influences on development of defects and genetic disorders aimed to mainstream our students to make them as good counselors and carers with concern of others. Activities included depiction of genetic counseling by a role play.

So the chapter deal all the cross cutting area very clearly.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR SUBJECT: MENTAL HEALTH NURSING UNIT 4 THERAPEUTIC COMMUNICATION AND NURSE PATIENT RELATIONSHIP

Date: 23/1/2020

Give every one importance. That is the core aspect of communication. When it comes in terms of therapeutic communication, the motto will be showing the visible concern and attention to the one who is receiving therapy.

To talk is a therapy. Showing clear hints and getting it makes a therapeutic communication remarkable and easy going.

We taught our students that the foremost aspect in nurse patient communication is observation, then listening.

The core techniques were explained first and then demonstrated.

Students doubts were clarified with examples.

All the interactions with students were one to one to make them in line to the core therapeutic techniques.

The entire class depicted all areas of human values and addressed cross cutting elements.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR MEDICAL SURGICAL NURSING II: UNIT VI: ONCOLOGICAL CONDITIONS

On 4th February 2020, an educational programme was organized bfor students of B.Sc. Nursing III year. Dr. Dilip Kumar Acharya National Chairman -IMA Cancer & Tobacco Control Committee (guest speaker) had taken a lecture on Cancer prevention and early detection, its incidence rate and also discussed about specific type of cancers (Breast, Uterine, Cervix and Oral). It was really beneficial for all the students . Along with the lecture on the spot poetry competition was conducted in which 37 M.Sc. & B.Sc. Nursing students participated.

So our students gained a sound knowledge on the common and prevalent oncological conditions.

The entire session was relevant to the time.

It encompasses all cross cutting issues.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR CHILD HEALTH NURSING : UNIT III: NURSING CARE OF A NEONATE

Preterm birth is a very serious health problem & leading cause of death in Children under the age of five worldwide. In association with Pediatric department of CH&RC we have arranged series of expert training sessions from experts of pediatrics. The experts were Dr. Rashmi Shad, Senior Pediatrician, CH&RC, Dr. Jenisha Jain, Neonatologist, CH&RC, Prof. Shreeja Vijayan, Professor, HOD Child Health Nursing Dept. CCON.

Prof. Shreeja Vijayan given an expert talk on good latching, problems of breast feeding and solution, diet during lactation, essential new born care which included demonstration and return demonstration by the students. This year, the aim was to strengthen more on skills, training, and knowledge about basic and advanced neonatal resuscitation care at periphery as well as tertiary apex setting, so that all undergraduate students could be able to do neonatal resuscitation accordingly and become brand ambassador for training the health care workers. Students also displayed posters on Preterm birth and their essential care. Quiz competition was also was conducted.

This entire program prepared our nursing students to take care of small ones in the hospital and every where which demonstrate all ethical components also.

CROSS CUTTING ISSUES

B. Sc. NURSING I YEAR

SUBJECT: ANATOMY UNIT 2: SKELETAL SYSTEM

Date: 21/04/2021

The subject Anatomy and Physiology concerns mainly of the structure, allocation of internal organs and its physiology.

Skeletal system was taught by expert faculty from Choithram Physiotherapy as they are well oriented to this topic.

All sessions were highly interactive and students learned the structure by touching the skeleton and bones. Later on reciting of the parts and drawing of the done.

In this manner it conveyed an ethical aspect of dealing the nature of humans with curiosity.

All cross cutting issues in gentle way understood and dealt as they caught up such learning aspirations.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING I YEAR SUBJECT: NURSING FOUNDATION UNIT 16: PROFESSIONAL NURSING CONCEPTS

Date: 22/09/2021

Nursing profession is unique that inculcate value system pertaining to human nature and sensitivity.

Professional nursing concepts and all practices come from theories and related work.

Students of B.Sc. Nursing first year, at the end of their first year should move as nurses in a very much but not ultimate professionals. For that they should know which are the major theories that connect to patient care.

Orem's theory is the most popular at the same time practiced theory in care of nurses professional wok.

The Peplau's and Roy's model are also renowned theories which are the core aspects to be considered and taught because all the three contained environmental as well as health determinants.

We have included theoretical model with application as activity for them.

CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: MEDICAL SURGICAL NURSING UNIT 5: NURSING MANGEMENT OF PATIENTS WITH BLOOD AND CARDIVASCULAR PROBLEMS

As the world struggles to fight COVID-19, we have never been more aware of the importance of our and our loved one's health. Cardiovascular disease (CVD) remains the world's number one killer, resulting in 18.6 million deaths a year. So on the occasion of World Heart Day, Choithram College of Nursing , organized an informative and enlightening session by our eminent speaker , Dr. Sagheer Ahmed , Interventional Cardiologist , Choithram Hospital and Research Centre, Indore.

.All our B.Sc Nursing students were available in the session.

The healthcare crisis we all have been living through has highlighted an urgent need to find different and innovative ways to connect people to heart health, particularly in lower resource areas and communities.

Harnessing the power of digital health to improve awareness, prevention and management of CVD globally is our goal for Word Heart Day 2021.

On this occasion our guest explained the need to maintain cardiac health and strict adherence of life routine. Students got deep insight during session on all cross cutting issues and environment around all humans which have to be preserved for the health of all.

CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: COMMUNITY HEALTH NURSING UNIT 4: EPIDEMIOLOGY OF NURSING MANAGEMENT OF COMMUNICABLE DISEASES

Rabies is not a common, but seen in Indian communities till day also. The vaccine in time well evacuate all blood, and sera with the microbes.

Identification of street dogs and safe guarding them also essential. The prevalent areas must be under surveillance too.

On 28th September 2021; on the occasion of World Rabies day, an educational session was arranged for B.Sc Nursing students regarding this lethal disease. Global COVID-19 pandemic has raised many doubts and misconceptions about the disease, their spread and about vaccination in general.

The session focused on facts about rabies , and emphasized that not to spread fear about the disease by relying on misinformation and myths. Let us use facts to raise awareness and educate others about rabies- a 99% fatal , yet 100% preventable disease.

The class was beneficial and high lightened human values and care towards the people in the society as nurses care for others too.

CHOITHRAM COLLEGE OF NURSING
CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR
SUBJECT: GENETICS UNIT 2

**MATERNAL, PRENATAL AND GENETIC INFLUENCES ON
DEVELOPMENT OF DEFECTS AND DISEASES**

Date" 21/09/2021

Children are gifts. Taking care of them is admirable. From conception till the maturity all require care. Mother's age, medicines and many other factors influence developing fetus. If not given proper attention the developing child may develop defects by majorly due to maternal age and linked addictions.

All these concepts are very clearly explained to all our students so that they can educate those who are in such back ground. Indian scenario is such a way that people get married for status and generation closeness.

These gaps can be matched when we compare olden concepts with young generation marriage systems. Still myths run in society and families with religion and regional dominance.

Classes on Maternal, prenatal and genetic influences on development of defects and genetic disorders aimed to mainstream our students to make the generation with clear concern and clarity.

Activities included depiction of genetic counseling by a role play

So the chapter deal all the coos cutting area very clearly.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR SUBJECT: MENTAL HEALTH NURSING UNIT 11 NURSING MANAGEMENT OF CHILDHOOD AND ADOLESCENT DISORDERS

Our B.Sc. Nursing III year students got the opportunity to get training from Anubhuti Seva sansthan which is a Society working for the welfare of differently abled children. The main focus of the society is to bring differently abled children in the front and provide training to them. For mentally retarded students the focus of the training is on ADL (daily living skills), mobility, Taylor frame and other topics. Society provided training to blind students on Braille lipi. At presently society is training to many students suffering from autism, mental retardation, blindness etc.

Objectives of the posting were:

1. To identify differently abled children
2. To identify type and classes of mental disabilities in children and adolescents
3. To learn and compare various features of mentally challenged children
4. Assist children in educational and physical activities
5. Learn the coping and support system in these children
6. Implement knowledge of child psychology in assisting the children to attain the skills according to their level of capabilities.

All the students in the batch assisted in all activities and gained skills in enrichment activities really needed for such children

This encompasses all cross cutting issues.

CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR MEDICAL SURGICAL NURSING II: UNIT VI: ONCOLOGICAL CONDITIONS

An online expert talk on Breast cancer prevention was arranged for students of B.Sc. Nursing III year on 17th October 2020. the expert talk was delivered by Dr. Dilip Kumar Acharya. The talk mainly focused on early detection, screening, and present treatment modalities used for breast cancer patients.

Even though the motto was teaching students on Breast cancer, it also created a sense of initiation to help others especially the females who are reluctant to consult a doctor. The expert lecture delivered more conclusive way of treatment options in the country which may be even accessible for those in need. Description of breast self examination also was one of the key area dealt.

The session entirely portrayed all moral aspects.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING III YEAR CHILD HEALTH NURSING UNIT II: HEALTHY CHILD

Date: 09/09/2021

All children are unique. Their nature and upbringing must connect them to a healthy world. The world where they learn with curiosity and high aspiration.

The needs of all children during the growth and development are the steps to another high level stairs. For that they require various necessities such as nutrition, environment (school, home) and play.

The children today are scarce of all these.

We assign our students while in pediatric unit to observe and explore the various growth stages and assist them to learn adaptation with positive outlook. These opportunities of exploration and activities make them good baby friendly nurses.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING IV YEAR SUBJECT: OBSTETRICAL AND GYNAECOLOGICAL NURSING UNIT 4: ASSESSMENT AND MANAGEMENT OF INTRA NATAL PERIOD

We teach B.Sc. Nursing IV year students the basics as well as advanced care tips of women at labor. These classes given at the class room and continued in the labor unit too.

Women at labour are really in need of kind attitude and emotional support from the care takers.

Period of prenatal, intra natal and inter labor stages are crucial for mother and baby health.

Our students learn the stages of labor by demonstration with models also.

During class room learning, lab teaching as well as training from hospital we convey an attitude of morality and cross cutting aspects to take care of women and newborn.

We involve our students in activities on newborn week also that enable them better nurses with advanced skills.

CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR SUBJECT: SOCIOLOGY UNIT 6 FAMILY AND MARRIAGE

Date: 26/04/2022

Today human beings have the feeling that everything can be under control of them if they have some sort of advanced technology.

The basic individual persona will be developed by the genetic aspects as well as the environment in which they bringing in. The main reason for changing world today is lack of love, basically towards own family.

Family and marriage must be identified in the society by all as unique and different. The system are different in different parts of the world.

But as Indians, we count the blessings of GOD at very first time and presence and well wishing of all closed ones.

This concept ideally bring the relations more close and the bond more stronger even among siblings. Keeping this view, we have assigned debate session on students view on dowry and parents role in marriage.

Our teaching to the students match to all cross cutting issues in relation to this particular topic.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: GENETICS UNIT 2**

MATERNAL, PRENATAL AND GENETIC INFLUENCES ON DEVELOPMENT OF DEFECTS AND DISEASES

Date: 09/11/2021

Maternal and prenatal genetic influences have a very deep and close connection with the early and even adult time some way.

Mainly the mother and child bond even the time the child in mother's womb also matters.

All these concepts are very clearly explained to all our students so that they can educate those who are in such back ground. Indian scenario is such a way that people get married for status and generation closeness.

These gaps can be matched when we compare olden concepts with young generation marriage systems. Still myths run in society and families with religion and regional dominance.

Classes on Maternal, prenatal and genetic influences on development of defects and genetic disorders aimed to mainstream our students to make the generation with clear concern and clarity.

So the chapter deal all the coos cutting area very clearly.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: GENETICS UNIT 2**

Date: 16/09/2023

Maternal and prenatal genetic influences have a very deep and close connection with the early and even adult time some way.

Mainly the mother and child bond even the time the child in mother's womb also matters.

All these concepts are very clearly explained to all our students so that they can keep this view for them and can relate this core area with others life to whom they care.

The relevance also mainly given and depict the false given ideas by the new generation ideologies of motherhood. Activities included question and answering about the maternal and prenatal aspects.

So the chapter deal all the coos cutting area very clearly.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

B.Sc. NURSING II YEAR
SUBJECT: COMMUNITY HEALTH NURSING UNIT II
DETERMINANTS OF HEALTH

Date: 12/01/2023

Health determinants is essential in the mainstream of every core health industry. But the need is really to understand what are the determinants which could be better planned and to be applied by understanding the marginal community to whom this must be more identified by peripheral centers.

As a child engaged in new initiation in any health related project the very first thing to be planned is who are the poor category to whom the services must be first applied and safe guarded.

Our college is taking and the concept and teaching our students the value based at the same time care oriented sustained aspects so that they can be better health care workers for our place and can be the lead to other scenarios.

Students get aware of the health determinants by group discussion and making list of determinants in the marginal community.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: SOCIOLOGY UNIT 6**

Date: 09/07/2023

Today human beings have the feeling that everything can be under control of them if they have some sort of advanced technology.

The basic individual persona will be developed by the genetic aspects as well as the environment in which they bringing in. The main reason for changing world today is lack of love, basically towards own family.

Family and marriage must be identified in the society by all as unique and different. The system are different in different parts of the world.

But as Indians, we count the blessings of GOD at very first time and presence and well wishing of all closed ones.

This concept ideally bring the relations more close and the bond more stronger even among siblings. Activities included asking students view on today's marriage system and what strategies to solve problems in Indian marriage.

Our teaching to the students match to all cross cutting issues in relation to this particular topic.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING II YEAR
SUBJECT: MEDICAL SURGICAL NURSING UNIT 8**

Date: 05/06/2023

Life of elderly is lone today.

The mainstream of public contain more than 43% of old between 57-90 years old. But when we think of the Indian scenario the quality of their life started lessening since last 15 years very drastically.

The reason is the changing trend in the graph of living style of the youth.

Parents are neglected and are being sent to old age homes or left alone. This part must be changed.

The teaching of students must be in such a way that inculcate the human values in them. We in the nursing course accumulated the very naive form of this care and practice it by making field trips, visits to slum ares, old age homes and talking to such people.

So this part encompasses all the cross cutting issues of gender, human values, environment sustainability etc.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

**B.Sc. NURSING IV YEAR
SUBJECT: NURSING RESEARCH AND STATISTICS
UNIT 6**

Date: 04/02/2023

The system of research in India is focused on very much of current scenario that directly influence human beings or the environment. But the developed countries still do researches on the retrospective areas so as to connect the present with past.

The way a research conduct, adding the data, and depiction straight away connected to the individual philosophy.

That is where the all ethical and human values comes. We inculcate a value system in our institute by teaching our students to be sincere and adhere to the standard to the Research Society and recommendations. We insist our students to avoid any kind of plagiarism.

Activities included in depth analysis trends as well as checking of plagiarism.

CHOITHRAM COLLEGE OF NURSING CROSS CUTTING ISSUES

M.Sc. NURSING II YEAR

SPECIALTY : MEDICAL SURGICAL NURSING- SUB SPECIALTY: CRITICAL CARE NURSING UNIT5: INFECTION CONTROL IN ICU

Date: 12/01/2023

M.Sc. Nursing final year students get in depth knowledge as well as hands-on skills from the specialized nurse experts of Choithram Hospital & Research Centre. The hospital has a well established surveillance system that maintains infection protocols in the Intensive care Unit for the safety of patients admitted there.

The experts give research evidence new information as well as changed protocols from time to time.

We adopt a culture of safety every where. This is utmost important to maintain the quality in nursing. Our students give exemplary safety advises to the patients in the hospital and take care of their own practices too.

Environmental hygiene and related all aspects were cared while teaching this topic to students as well as insisted self motivation as a key for all this.

So our students hold and carry a caring culture to take care of critically ill.
